

Cleaning and disinfecting

disinfectants for the novel coronavirus (COVID-19)

Surface cleaning of common spaces and frequently touched objects is more important now than ever. This along with frequent hand-washing and wearing masks helps to prevent the spread of the coronavirus.

TorZo Surfaces' prefinished wall coverings, countertops, casework, flooring and tabletops are impervious to health care-grade wipes and spray sanitizers. Prefinished TorZo goods are well suited to high-traffic and high-touch indoor environments. Even harsh disinfectants are compatible with prefinished goods from TorZo.
